KHUSH

BBA Student – Digital Marketing & Artificial Intelligence

khushbareja123@gmail.com | linkedin.com/in/khushbareja | github.com/khushbareja | Panipat, Haryana, India

CAREER OBJECTIVE

Motivated BBA (Digital Marketing & Artificial Intelligence) student at Lovely Professional University with hands-on retail marketing experience and academic project work spanning consumer research, design thinking, AI prompt engineering, and brand strategy. Skilled at translating consumer insight into actionable marketing plans and AI-assisted content strategy. Seeking an internship or entry-level role in digital marketing.

SKILLS

Marketing:	Digital Marketing, Consumer Research, Market Research, Design Thinking, Marketing Mix (4Ps), SEO Basics
AI & Tools:	AI Prompt Engineering, ChatGPT, Canva, MS Office (Word, Excel, PowerPoint), Basic Git/GitHub
Soft Skills:	Communication, Customer Handling, Teamwork, Creativity, Problem Solving, Time Management

WORK EXPERIENCE

Marketing Intern – Bareja Crockery House, Panipat *June – July 2026*

- Assisted in promoting store products and seasonal offers to walk-in and repeat customers, contributing to increased footfall.
- Supported local marketing efforts including in-store display arrangement, customer engagement, and word-of-mouth promotion.
- Gathered informal customer feedback on product preferences and pricing to help guide stock and display decisions.
- Learned practical fundamentals of retail sales, customer relationship handling, and small-business marketing operations.

ACADEMIC PROJECTS

CampusBite – Campus Food Delivery Platform (UX & Consumer Research)

Course Project, Marketing & User Experience – Lovely Professional University
Repository: github.com/khushbareja/CampusBite-Marketing-UX

- Identified a genuine consumer need among hostel students and built a customer persona and empathy map to guide design.
- Applied the 5-stage Design Thinking process (Empathize, Define, Ideate, Prototype, Test) to design a food-ordering user journey.
- Developed a complete Marketing Mix (4Ps) strategy covering product positioning, pricing model, campus distribution, and Instagram-led promotion.
- Created a clickable website prototype and a structured user-testing plan, translating peer feedback into concrete UX improvements.

ECOSTRIDE – AI-Powered Sustainable Footwear Brand Pitch

Course Project, Prompt Engineering for Generative AI – Lovely Professional University
Repository: github.com/khushbareja/ECOSTRIDE-Brand-Pitch

- Co-built a brand strategy for a sustainable sneaker brand targeting Indian Gen Z, covering mission, positioning, and 5 core brand values.
- Engineered structured AI prompts (role-based, constraint-driven) for Instagram captions, Reel scripts, and product image generation across ChatGPT, Midjourney, and Runway.
- Designed a 4-pillar social content strategy and a 14-day Instagram content calendar tied to 8 targeted SEO keywords.
- Benchmarked engagement KPIs (reach, save rate, hook retention) and built a feedback loop to refine future AI prompt iterations.

ADDITIONAL ACTIVITIES

- Actively contributed to two group academic projects requiring cross-functional collaboration, presentation design, and client-style pitch delivery.
- Maintains an active GitHub profile (github.com/khushbareja) documenting project files, prototypes, and prompt-engineering work.
- Interested in pursuing further certifications in Google Digital Marketing and Meta Social Media Marketing.
